Ahmedabad, India

SUMMARY

Cyber Security student pursuing B.Tech with hands-on experience in Ethical Hacking, VAPT, and penetration testing. Skilled in tools like Kali Linux, Burp Suite, Nmap, Wireshark, and Metasploit. Built Android-based penetration testing application and currently gaining real-world exposure through internship. Passionate about identifying vulnerabilities and improving system security.

KEY HIGHLIGHTS

- Built an **Android penetration testing app** with multiple monitoring modules
 - Managed a **financial advisory app (2+ years)** with active user guidance
 - Gained hands-on exposure to **VAPT tools and real-world workflows**
 - Learned vulnerability assessment using **network and web security tools**
 - Strong foundation in **Linux, scripting, and security concepts**
-

EXPERIENCE

Persevex Company — Cyber Security Intern

Ahmedabad

- Performed vulnerability assessment and penetration testing (VAPT) on web applications
- Conducted security testing using Burp Suite, Nmap, Wireshark
- Identified basic vulnerabilities and analyzed application security flaws
- Gained hands-on exposure to real-world cyber security operations and attack simulation

Elevance Skills — SOC Analyst

- Completed SOC Analyst training program with real-world scenarios
- Performed log analysis, alert monitoring, and basic incident response tasks
- Gained knowledge of SIEM concepts, threat detection, and security operations workflows
- Worked on cyber threat analysis and monitoring activities

Daily Intraday Tips — Financial Adviser & App Owner

2020 – Present | Ahmedabad

- Built and managed a financial advisory mobile application
- Provided users with intraday trading insights and financial decision support
- Developed strong skills in user handling, data analysis, and risk awareness

PROJECTS

Android App for Penetration Testing

- Developed using **Kotlin**
- Implemented modules like:
 - Notification Listener
 - Screen Monitoring
 - Camera Listener
- Designed for learning **penetration testing and device monitoring concepts**

Threat Intelligence Dashboard

- Built using Python (FastAPI)
- Aggregates malicious indicators (IPs, domains, URLs) from public sources
- Helps in real-time threat analysis and monitoring

Web Vulnerability Scanner

- Developed using Python (FastAPI) + JavaScript
- Scans websites for:

- Security headers
 - SSL configuration
 - CMS detection
 - Identifies web vulnerabilities and misconfigurations
-

EDUCATION

B.Tech – Cyber Security

Gandhinagar University

2025

CERTIFICATIONS

CCDP – Certified Cyber Defence Professional

Cyber Security Internship Certificate – Persevex Company

SOC Analyst Certificate – Elevance Skills

IEEE Certified Technical Program Participant

TOOLS & TECHNOLOGIES

Security Tools:

Kali Linux, Burp Suite, Nmap, Wireshark, Metasploit

Core Skills:

VAPT, Penetration Testing, Ethical Hacking

System & Scripting:

Linux, Command Scripting

Other:

Network Security, Vulnerability Assessment

BUG BOUNTY / COMMUNITY

- Actively learning **web security and vulnerability discovery**

- Exploring bug bounty platforms and responsible disclosure practices
